

BC Rail SD40-2s Repaints

This pack contains repaints of the default SD40-2s into British Columbia Railway/BC Rail livery.

To install first unzip the 'SD40s.rwp' and start Rail Works/Train Simulator 2012 and select Package Manager, click Open and go to the location of 'bcoltankcars.rwp' and select it. The SD40-2s should now be installed and ready to use in your consists.

For more information and news about the Fraser and Cariboo route featuring a portion of the BC Rail main line please check out <http://www.milepostsimulations.com/>

Original Model by Kuju

Repaint by Jonathan Lewis/Milepost Simulations
